AWS Big Data: Module 5 Assignment

Problem statement:

You work as a Big Data Engineer at GrapeVine Pvt. Ltd. Your company is currently working on data visualization. You have been assigned certain tasks for the fulfillment of this activity. Your organization uses AWS services for its Big Data needs.

Tasks:

- Create a dataset from the Redshift cluster database (maindata) you created in the last module
- Use the created dataset to create an analysis
    - Start doing visualizations. Choose four different visuals and create them
    - Create a dashboard for the analysis
- Use the same CSV file from your local system to create a dataset
